eVolv
Digital Evolution
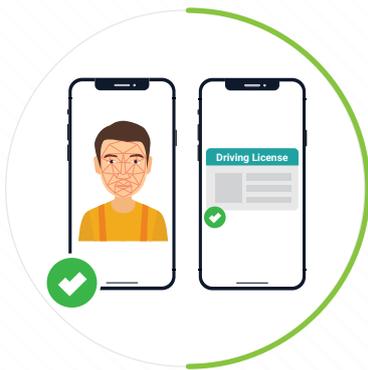

eVolv is a Software Development Kit (SDK) that helps transform your mobile apps into state-of-the-art digital platforms.

iDMISSION
empowering identity

Here are few of the capabilities that eVolv brings to your mobile apps.
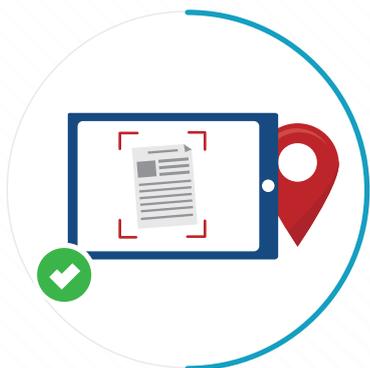

Mobile Customer Acquisition

- ID document capture, validation, data extraction using OCR, Barcode, MRZ
- Selfie capture using live face detection
- Biometric match of selfie against photo on ID document

Biometrics

- Easily add Fingerprint, Face, Voice and Iris biometrics
- Connect to 3 rd party or government databases to verify identity
- Create your own Automated Biometric Identification System (ABIS)
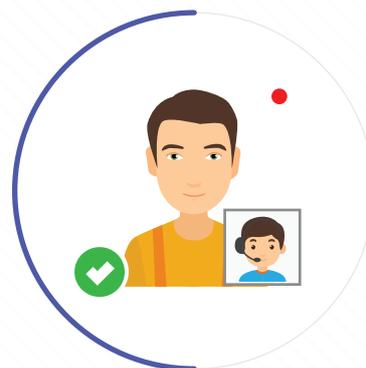

Additional Data Acquisition

- Capture any kind of document (Utility bill, Bank statement)
- Capture GPS location on demand
- Read bar codes, QR codes automatically

Video

- Capture a video recording on demand
- Enable video conferencing on demand
- Use face images from the video stream for biometric matching.

Enhanced Security

- Signature capture using touchscreen
- One Time Password (OTP) and Token, Generation and Verification
- Digital Signatures

iDMISSION
empowering identity

Machine Learning

Hundreds of thousands of images are used to train our artificial intelligence platform so that the machine learns to identify patterns seen in good and bad images.

Multi Biometrics Support

eVolv is the only SDK in the market that supports multimodal biometrics. eVolv supports the mobile device microphone and camera for face and voice and fingerprint capture. Additionally, external fingerprint and iris scanner are also supported.

Omnichannel

eVolv works with iOS and Android native app. It is easily integrated into your web site and can capture images using a web cam. It is also available as an API.

Easy integration into your process

eVolv is designed to seamlessly fit into you existing processes with minimal integration efforts. We provide the integration documents and a test application. Integrations are often completed in a single day!

Secure

PCI-DSS certified every year, with quarterly scans for vulnerability detection and elimination. We are also compliant to the EU standards for data protection (GDPR).
